THE FIELD COACH

FIELD COACHING RECORD

20 Sept

FOLLOW-UP PLANNED

Subtraction with regrouping

Primary School, Rampur · Sunita Devi · Grade 2 · Mathematics

What was observed

> "The teacher asked five subtraction questions. The same four children answered each time."

> "About half the class did not give a response during the questions I observed."

> "The teacher demonstrated regrouping on the board. I did not see concrete materials used during this part of the lesson."

REFLECTION TO REVIEW

Responses from a few children may not show what the rest of the class understands. An all-child response routine could help the teacher check more widely.

The commitment

TEACHER WILL

After one worked example tomorrow, ask every child to write an answer on their slate and show it together. Use the responses to choose what to revisit.

MENTOR WILL

Co-plan a five-minute example and model how to respond to different answers.

LOOK FOR ON RETURN

How many children responded? What did the teacher change after seeing the responses?

FOLLOW-UP
